

①  $x$ : number of points in a game

②  $x \sim N(\bar{x}, \sigma)$

③  $P(x > 26)$

Using R  
→ 18.4%

④  $P(x < 24)$

⑤  $P(x = 25) = 0$

OBS.: There's no  
area here, therefore  
the probability is 0.

---

Q

(a)  $X \sim N(2.7, 1)$

(b)  $P(X > 3)$

Using R  
→ 38.4%

(c)

Using R  
→ 24.2%
